

In the Name of Allah, Most Gracious, Most Merciful

Many professors and students have approached me asking about Islam and, since I have difficulty speaking English, I have decided to express myself through written messages to clear the doubts of these people.

(Islam is the religion of the first and the last)

In the Name of Allah, Most Gracious, Most Merciful

All praises are for Allah, Lord and Sovereign of the worlds and the Peace and Blessings of ALLAH be with His servant Muhammad. Mercy to mankind and this be with his loyal followers.

If mankind knew the value of this life, they would have lived it with love, respect and cooperation, despite the different beliefs and types of thoughts, since all are descendants of one man: Adam, peace be with him. Nationality differences is not the cause of evil between people (dislike between men and the environment), the reality is that man does not understand himself. All mankind lives on the same planet and, before them, existed generations created with just one purpose: **Worship the Lord of the Worlds, Most Glorified.**

Therefore ALLAH (Most Glorified), did not order the creation of various religions. If Allah had ordered it that way, the people on the Day of Final Judgment would protest before their Creator since some entrusted them their way of worship easier than others. In reality Allah made one religion, but people diverted forming different sects and each generation would support the same method based on the religion that they had within their reach. If the people understood this truth, much suffering would have been avoided; they would have felt the sweetness of obedience towards their Creator, Allah (Most Glorified).

For those seeking the truth, wanting knowledge and salvation, I offer this message: **Islam is the message for the first and the last**

SHEIKH IBRAHIM ABOU SALEM

Imam of the Islamic Center of Ponce, Puerto Rico

Islam Is The Message For The First and The Last

Perhaps whomever listens or reads this message thinks that we are forcing them to convert to this religion (Islam), but the truth is that it was absent from the life of the non-Muslims who died or still live on Earth. And in this era of informative technology, there is no excuse for any human being nowadays, to not know anything about ISLAM.

Perhaps it is something strange to the non-Muslim, when they find out that their religion is Islam, without knowing.

How is this?

Before anything, in this message I would like to speak with the non-Muslims without mentioning evidence from the Quran (Holy Book), nor from Hadith (sayings and acts of the prophet). Why?

Because non-Muslims do not believe in the Quran nor in Prophet Muhammad (peace be upon him), and because the belief of the non-Muslims in the Quran and the prophet is an individual matter and own responsibility after learning the content of this message. I will only speak of material evidence, clear and set, and that the mind can accept without religious influences. That way I can clear up unknown matters by some through clear evidence for everyone.

There is no doubt that the Creator of the Universe, including the skies, the earth, the angels, jinn and human beings is ALLAH, the only God without partners.

He is one, Eternal, He neither begets nor is he begotten, and there is none like unto Him. It is for this reason that if there existed a partner with ALLAH, the universe would be unbalanced. And by not begetting or being begotten, He has no parents nor offspring, as the Christians say about Jesus, and the Jews about Uzayr. Because everyone agrees that Jesus came from his mother Mary, and that mother is a creature of ALLAH, then she and the one born from her are creatures of ALLAH. Those who say that Jesus (peace be upon him) is the son of God, are mistaken and in a big error.

Why?

Because the birth of Jesus without a father is not impossible for ALLAH.

Why?

ALLAH created Adam (peace be upon him) without a father and without a mother. And created Eve from Adam, and created the rest of the living beings from a father and a mother. And that is evidence of the absolute and infinite power of ALLAH in his creatures. And if He wills for something to exist it just gets created.

And those that say that ALLAH gave his son Jesus or sacrificed him for the sin of Adam, this is false.

Why?

Because we have to ask: Who did God sacrifice His son for, if He is the only God, and there is no other God but Him? And if Adam committed an error, that is normal because he is a human being and in him there is good and bad, and ALLAH can forgive his sins without sacrificing someone or bloodshed. And if Allah put as a rule or divine law that to forgive someone's sin, somebody has to be sacrificed (and that is impossible from ALLAH) that would have been as a law for everyone, and each one of us would be presenting our son as a sacrifice to ALLAH to receive forgiveness of our sins. And that is not a reality in our lives.

If ALLAH substituted Ishmael or Isaac, sons of Abraham (peace be upon him), with a big sheep as a sacrifice, assuming it was one of them, when Abraham saw in his dream that he was sacrificing his son (and what prophets see in their dreams has to be fulfilled), the question is: Would ALLAH accept for Jesus (who is a grandson from Isaac's grandsons) what he rejected for Ishmael or Isaac?

Or did Allah go back and regret His first decision and gave Jesus in place of Isaac or Ishmael? Or did He notice that He had forgotten? (The glory of ALLAH turns away from all this). ALLAH is only one, and did not beget nor is begotten. Before creating Adam (peace be upon him) there had to be created a place where he would live to worship ALLAH, which is why ALLAH created the earth first, because it is a base, Allah started with the earth, which is the center of the universe, as has been verified by scientists (and it is appropriate to start at the base) which he created in two days, Sunday and Monday. Then He left on the earth everything that Adam and his descendants would need to live; and the mountains on Tuesday and Wednesday. And on Thursday, He created the skies because they serve as a roof. Then gave to each sky their task and everything that is needed for matters that only ALLAH knows. On Friday He created the stars, astros, the sun, the moon, the angels, the jinn and then created Adam in the final hours of Friday. That is how the six days are, starting Sunday and ending Friday.

ALLAH created Adam from all kinds of dirt, joining mud that was black, white, yellow, red, etc. That is why these colors appeared in the offspring of Adam. Adam remained forty years in mud (wet dirt).

Then, forty years more, matured (dry dirt) and then forty years hardened and soft to the touch, and then He blew in the soul. That is why the human being goes through these stages which are forty days as a drop of sperm, forty days as a blood clot, and then forty days as an embryo, which is a piece of meat, then life is blown in after these three stages which are one hundred twenty days.

The human being is made up of two elements, the first is material and is called the body, and the other is spiritual and is called the soul. The body is made up of elements, and the elements come from the earth. So the human being is from the earth, the same as Adam, and returns to the earth through death, the same as Adam who returned to the earth after his death. This is the first element and the other element is the soul which is the secret to the life in the human being and nobody knows its reality except ALLAH.

The truth is that it is a creature of ALLAH, it was created before Adam and the souls were found in the wisdom of ALLAH and they met, some adapted to each other and others did not. And each soul that met with another in the wisdom of Allah, have to meet again with each other in life on earth, and the evidence of this is that you meet a person and feel a relationship from the first time you meet, or you can feel some sort of rejection, the same as when you had met in the wisdom of ALLAH.

ALLAH put Adam on earth to use it and to worship ALLAH on it. But, how to worship ALLAH? He ordered one religion to Adam and his descendants. That religion is called Islam, in it are believed all prophets and messengers and their people starting from Adam until the end of life, so there is only one religion. Some may ask themselves: How is there only one religion and mankind had changed from nation to nation, from one era to another, and are different in height, weight and strength, especially when Adam was nearly 60 cubits tall and 7 wide, and between Adam and us there are many differences in height, width, and that difference needs an adequate religion each time there is change? We say that the religion (Islam) is unique but has two parts, one part that ALLAH improves through it the inside of the human being, and the other part ALLAH improves through it the exterior of the human being, and the human being has an interior and exterior.

The heart of the human being and the center of thinking are found in his interior; and his extremities, which do the work, are in his exterior.

So, if the heart is filled with good, it is reflected in the exterior of the human being and you see an upright and honest human being, but if the heart is filled with bad thoughts, etc., it is reflected in his exterior as harmful to himself and everything that surrounds him. So the part that ALLAH improves through it, the interior of the human being, is called belief, and the other part that ALLAH improves through it the exterior of the human being is called doctrine (Sharia) which is a mission or temporary legislation to be grafted onto the unalterable religion.

Belief has different angles which are: believe in ALLAH, in His angels, in His holy books, in His messengers, in the day of final judgment, and in the destiny of the human being be it good or bad. And destiny means everything that happens with the human being, from death, illness, loss of assets, and fear. The human being should be patient and accept ALLAH's destiny and knows that it is a test from ALLAH towards his patience in difficult times and the same happens on the good side. So that is the belief and its angles, the belief in ALLAH, His angels, his books, his messengers, the day of final judgment and the two sides of destiny, is a set belief between all nations with all of the prophets and messengers from Adam until the world's end, because it is not related with height, weight nor strength to be applied. And the sharia (doctrine) has its angles which are: bearing witness that there is no other God except Allah and that (such prophet) is the messenger of God, pray to God, almsgiving, fasting, and pilgrimage. That is why muslims in the time of Adam would bear witness that there is only one God and that Adam is their messenger; and muslims in the time of Noah would bear witness that there is only one God and that Noah is their messenger; and the muslims in the time of Abraham would bear witness that there is only one God and that Abraham is their messenger; and the muslims in the time of Moses would bear witness that there is only one God and that Moses is their messenger; and the muslims in the time of Jesus would bear witness that there is only one God and that Jesus is their messenger; and the Muslims in the time of Muhammad would bear witness that there is only one God and that Muhammad is their messenger. The muslims in each time period and each place have to believe in all the messengers and prophets with no preference between them.

That is why each nation has prayers and almsgiving, and they fast and do pilgrimage with an appropriate way that goes according to their physical appearance, be it height, weight or strength, as it suits them. So these worship practices are different from one nation to another and from one time period to another, it varies and that is what sharia is called, which is way or method. The people from the time of Adam had their methods and are different from the ones from the time of Noah, which were different from the ones from the time of Abraham, and so on consecutively.

Adam was 60 cubits of height and 7 of width nevertheless mankind was decreasing from size and strength until our condition today which is more or less 6 feet in height and 2 feet in width, that is why the difference in appearance and strength has to have consequence in being able to carry the religion properly, and that is why there had to be a change in methods and orders according to that change in the human's size and strength.

This can also be seen very clearly in the different ages and stages of the human being, the small has a certain way and strength, and the large has another suitable for him. These differences are not only in human beings but also in other beings like: in the plants, for example the cane can be seen in its first harvest different than the second or third, there are differences in height and plumpness.

So the conclusion of what we are saying is that belief is set from Adam until the end of the world, and the sharia varies from one nation to another until the end of the world, and Islam is one: belief and sharia (doctrine). Someone may ask: what is Judaism and what is Christianity? We say: Judaism is a sharia (doctrine method) of Islam, and Christianity is also, because Islam, as we said before, has a unique and set belief that has sharia (doctrine) or variable methods or different, like Judaism is a method or doctrine of Islam and Christianity is a method of Islam.

Judaism and Christianity may be called **religions**, and that is true taking into consideration that they are different methods and doctrines, and those that call them **religion** are referring to a set belief.

ALLAH taught human beings the reality of religion on both sides, belief and sharia, through His messengers between human beings, who were chosen by Him to bring a message, they were created under His supervision and protection, and they were distanced from all evil to be examples for other human beings and so nobody could doubt them. ALLAH supported His messengers with evidence that no human being could present. That is what is called a miracle. A miracle is something unusual and nobody can match it or match something similar to it. Someone can ask: how does the messenger receive ALLAH's order? We say that ALLAH chose between His emissary angels to take the message to the messengers. These messengers sometimes come as humans, others in dreams or on occasion ALLAH gets His words to the messenger without intermediary and that way the messenger receives ALLAH's words without seeing him.

ALLAH always takes into account that the messenger's miracle be the same that the town is distinguished by, but can never do something similar. We can take, for example, when ALLAH sent Moses to Pharaoh in Egypt to save the people of Israel from him. What was most distinguished and advanced in Egypt was magic, it wasn't reality as one would see, but illusions that the magician with his hypnotism and hand abilities can make the people's eyes see things that way, so magic is not from miracles, and the evidence is that many people know and learn it easily and it is available in any time period. That is why ALLAH chose that miracle for Moses because it is the same as what his people were known for. ALLAH gave him a rod, then when put on the floor would become a giant serpent that swallowed everything, and also if Moses put his hand in his pocket, it would come out white.

In the beginning they believed it was magic which is why Pharaoh called his magicians to do a bigger and more powerful magic, when they presented their rope as serpents and Moses threw his rod and swallowed everything there, that is when they recognized that what Moses did was not magic but truth and miracle and they prostrated before ALLAH, God of Moses and Lord of the worlds.

Through those two miracles and others, ALLAH saved the people of Israel from Pharaoh's hands and when Moses led the people of Israel to the Holy Land, ALLAH revealed the Torah as doctrine and teaching to the people.

Then the Torah, which ALLAH revealed to Moses, was not a miracle but a doctrine and teaching and light to the people, but the miracle was in other visible things like the rod, his hand and other things. Also when ALLAH sent Jesus (peace be upon him) to the people of Israel, in that time period, medicine is what was distinguished and advanced. The most that doctors can achieve is cure complicated illnesses but not bring the dead back to life, cure the blind nor the lepers at birth, that is why ALLAH chose for Jesus a miracle that is the same as which the people stood out, and taught him how to bring dead to life, cure the blind and the lepers taught him what food and other things that people save in their houses. Then he revealed the gospel as doctrine and teaching and is not a miracle as we mentioned before.

The torah and gospel revelation is evidence of what we said, that humanity is different from one time period to another in taking the religion that was ordered and that presents change in sharia, which is doctrine or method without changes in belief, which is set, and is Islam. Jesus was the last messenger of ALLAH for the people of Israel.

But, who is Israel?

Israel is Jacob, son of Isaac, son of Abraham, who married the egyptian Hagar, who gave him a son named Ishmael, then he had a son with Sarah (who was barren) whose name was Isaac. Allah gave Isaac a son named Jacob and Jacob is Israel. So Isaac is the second son of Abraham, who ALLAH gave in his descendants many prophets for the people of Jacob through history and the last of them, as we mentioned before, was Jesus and the books that ALLAH revealed to those messengers are the doctrines and methods that contain how to worship ALLAH, which are the doctrines that ALLAH wants for His believers, that represent the second part of Islam.

The books contained announcements of other prophets and holy books that would come in the future. So it was like a chain, because He who sent the messengers and books is One, the Only God (later we will clear this topic with a special message, ALLAH willing). Many years after Jesus, ALLAH chose for mankind a messenger, but not from the people of Israel, but from the trees, who is Muhammad, descendant of Ishmael, the first son of Abraham.

The prophet and messenger Muhammad was born in Mecca without distancing from them all his life and nobody could doubt his honesty and his words and other characteristics, even naming him The Truthful when he reached 40 years of age. ALLAH sent angel Gabriel with the message which is The Holy Quran. God chose the miracle of this messenger from the same as his people were distinguished, in that time they were famous in poetry, readings, and art of speech. That is why ALLAH chose the Quran to be the miracle of the prophet, and nobody would hear part of the Quran without believing in the messenger and all that it said and would bear witness that the words of the Quran are not words that come from a human being, but from the Lord of the worlds.

Someone may ask:

If the Quran is the miracle of Muhammad, where is his book comparing Moses and Jesus?

We say that ALLAH chose The Quran as a miracle and book at the same time, unlike the previous messengers. He promised to protect it from any change, alteration or modification, different from the past books.

Why?

The past books did not need protection because the prophets were never interrupted in any moment and there was a case of one nation only with more than one prophet in the same time, for example, in the time of Moses, his brother Aaron, Joshua son of Nun and Kalib, son of Yufna. Each time a prophet dies, another follows and that was the obligation of the people, recognize that prophet and believe in him and the doctrines that he brought, and each prophet that comes maintains the book that was before him, that contained the actual sharia or doctrines until ALLAH sends another messenger with another message which means another sharia (doctrine) that is applied to the advances of that time period.

Muhammad (peace be upon him) came after Jesus. As we mentioned before, there will be no more prophets after him, until the day of Final Judgment. And this is true and reality affirms that because we are in the 15th century after Prophet Muhammad and no other messenger has come or will come, ALLAH willing, because Muhammad was the last prophet and the seal of the messengers and it is normal that there will be no more books after the Quran, that is why God promised to protect it, as we mentioned before, why?

Because Muhammad died and let his followers preach the religion in all the world because Muhammad was not sent only for his people, as the previous prophets were before him, but for all the world and it is something important that the preacher has a miracle in his hands to convert people to that religion. That is why it is important to protect the Quran, because ALLAH put many miracles in it, miracles that will appear and will not be discovered by a muslim reading the Quran. ALLAH hid in The Quran a treasure in a secret place and the discovery will be by the non-muslims, so that The Quran be a light that will shine and direct them. How? Every day the non-muslims make different investigation, through them they come to many scientific discoveries that were previously unknown by humans: about human beings, astronomy, insects, plants, and others. They achieve rewards and scientific recognition for those discoveries, and those discoveries come to public light, muslims did not notice that reality and when the muslims see it again, they notice that The Quran points out that scientific reality, which was discovered by the scientist (British, French, German, American, or Arab) and that is present in the book of Allah, which is the Quran. The part pointing to that scientific information is interpreted in the Quran and is shown to the Scientist who made the discovery, and then he converts to Islam bearing witness that there is no God except ALLAH and that Muhammad is the messenger of ALLAH, because he is certain that nobody knew that discovery nor had discovered that scientific discovery before him, and if this reality is in the Quran, and the contents of these verses, means that this is the word of ALLAH and the man who revealed this Quran is a messenger of ALLAH, and that is when they believe in prophet Muhammad (peace be upon him) and in the Holy Quran. That is why it is logical and wise that ALLAH promised to protect the Quran, unlike the other books.

As we mentioned before: for the people to believe in the word of the prophet or the message of a messenger, there has to be proof, and the evidence has to be a miracle that nobody can bring similar. We have the duty to invite the non-muslim to Islam, which is their religion, their father's, and grandfather's, it is the religion of his children and grandchildren after him, ALLAH willing, because that is the only way we free ourselves from our responsibilities before ALLAH on the day of Final Judgment.

Here we present some examples of the scientific discoveries in which The Quran is advanced and had knowledge of before modern science for more than 15 centuries.

1) The Quran announces, before the pathologists, that the senses were concentrated in the skin area:

It was believed that the senses were characteristics of all the body including all the parts, but modern pathology science in the 20th century discovered a new reality that people never knew, which is that the center of feeling pain and others concentrates on the skin area to a large extent, until the human does not feel the pain of inserting a needle until only when it is inserted in the skin area because the sensors are found more on the skin. But The Quran mentions this reality over more than 14 centuries ago and before it was discovered by scientists of pathology in the 20th century.

This is mentioned in The Quran, chapter 4, verse 56 (Indeed, those who disbelieve in Our verses – We will drive them into a fire. Every time their skins are roasted through We will replace them with other skins so they may taste the punishment. Indeed, Allah is ever Exalted in Might and Wise.) And this means that feeling the pain and punishments are concentrated on their skins to taste the punishment of fire.

2) The Quran announces, before the pilots discovered it, that a human feels narrowness and pressure in the chest when he gets to high levels of the atmosphere, which were discovered in the beginning of the time period of aviation, that there is a feeling of narrowness and oppression in their chests that increases while they are going up in the atmosphere, until they asphyxiate, and when they investigated it was discovered that the amount of oxygen reduces while the human being goes higher up.

That reality was not known before because people thought that the air expands with all its elements to other planets and stars. But The Quran mentions that reality before being known by humans and before being discovered by pilots. For 14 centuries this is in the Quran, chapter 6, verse 125 (So whoever Allah wants to guide – He expands his breast to [contain] Islam; and whoever He wants to misguide – He makes his breast tight and constricted as though he were climbing into the sky. Thus does Allah place defilement upon those who do not believe.)

Notice in the words of ALLAH when He says (as though he were climbing into the sky). And The Holy Quran is filled with many Science examples of the plants, insects, geology, the world of fish and the seas which we are going to mention in due course, ALLAH willing.

Through everything previously mentioned we say that Muhammad (peace be upon him) is the messenger of ALLAH, who was sent for all mankind with the doctrines of Quran. This book contains the belief and the doctrines at the same time. And with it, religion was completed as God (ALLAH) says in Chapter 5, Verse 3 which means (This day I have perfected for you your religion and completed My favor upon you and have approved for you Islam as religion).

Those doctrines that contain what is suitable for all mankind until the end of the world, the same as the Torah was the doctrine of Moses, the Gospel of Jesus (peace be upon them both), and there is nothing on the earth today, no book that can be source of laws and doctrines and be the original word of ALLAH except the Quran, which ALLAH took charge of protecting, for the needs of mankind, so that believers increase their beliefs and to be a light for those who are not yet muslims, if ALLAH wills.

.....

When you read this message and live with it, be sure and believe its content, there you will know that Islam is your religion and is your belief which you did not know for a long time, and you will know that there are no religions but only one which is Islam with its set belief and variable doctrine according to the needs of mankind in each time period and each nation, as we say if the people say religions, the variable doctrines are taken into account, and if they say only one religion, united set belief is taken into account. Belief is believing in God (ALLAH), His angels, His books, His messengers, the day of Final Judgment, and believe in destiny, whether good or bad.

Doctrine is to bear witness that there is only one God (ALLAH), that Muhammad is the messenger of God (ALLAH), make prayers, almsgiving, fast during the month of Ramadan, and make pilgrimage to Kabbah if you can only once in life.

If you would like to convert to Islam, just bear witness that
(there is no other God except God (ALLAH) and that Muhammad is messenger of ALLAH)

(Ashhadu An la ilaha ila Allah wa Ashhadu Anna Muhammad Rasulu Allah)
